

## **A Case Study on bringing back the peace again in the whole family in Hungary**

**June 19 2012**

Our story dated back to January 2012, when my 2.5 year-old son (Daniel) had constipation and could not poop for 4 days. When he managed it the hardness injured his anus and the blood and pain frightened him at a level that after words he would not like to poop again. The wound in his anus recovered only in 3.5 week time and caused a continuous stress around pooping. He could manage it only with a laxative and a cone but still with lots of crying and pain. We tried all available practices without any success. We knew that it was not an organic failure rather a deep stress, a complex in his head. All my thoughts pivoted around the problem and in my desperation I was starting to tell our story to my friend, when it turned out that they had similar problem (fortunately without bleeding) few years ago, when they met personally Dr. Ajay Kumar Singh and he helped them successfully. Without much believe I asked her to write to Dr. Ajay and ask for his assistance on March 1, 2012 (Details attached as Annexure I). He answered to mail in a day and asked us to report the development on a daily basis. He started the healings on a daily basis. The recovery has slowly started, first we skipped the cone (what Daniel hated), later the laxative. After a few weeks spontaneous pooping has started, in the beginning on every second day, later each day. We are more than sure that this was the effective healing and divine energy via Dr. Ajay Kumar Singh! We are very grateful to his great success and will never forget the kind and magnanimous help! This divine miracle released the whole family and brought back the peace again. God Bless You Dr. Ajay!

One more question, please guide us, what amount of donation is sent by others to similar recovery? Thanks a lot for this information too!

Warm wishes,

Zsuzsanna and Anita

Subject: greetings from Godollo

Dear Ajay,

I do hope my letter finds you in good health. We are OK, kids are growing and each day they are getting more clever, we can talk to them like to other adults.:

The reason I am contacting you is asking your kind assistance to a small kid. I have talked about your success with our daughter to my good friend and found that they desperately need similar help. She got 3 kids and her youngest, 2,5-year old son has similar difficulty with defecation that my daughter, Hanna had.

Last time after several days he could defecate with a glycerin cone but the hardness injured his small anus and started bleeding. During the conference in Turkey 3 or 4 years ago you helped so greatly to us, that Hanna was never bunged up later. Since that time we frequently remember you and your ability that was the only cure, that helped. We would very much appreciate if you could help us again. Please let me know if you need any further specification on Daniel, maybe a picture or something other.

I would be happy to receive your reply and also some news about you and your family.

Wishing you all the bests and hugs,

Zsuzsanna and Arpad from Godollo, Hungary
